Easy copying, quality results

Océ wide format copier, better by design

It's a digital age. But you still need copies: from hard-copy originals, inkjet plots or corrected drawings. With the Océ TDS100 wide format copier, you can make all those copies easily and in high quality, whenever you need them. The Océ TDS100 not only reduces costly outsourcing, it also puts you in control of your schedule. And its great design makes it a perfect fit for every working environment.

Easy for every user

The Océ TDS100 brings easy wide format copying to all your users and applications. It's always instantly ready for use, so you can copy without waiting. Increasing efficiency even more, the Océ "green button" means one touch operation for copies that are right the first time, every time. There's no need for training, no complex settings, no trial and error, and no wasted copies.

The intuitive control panel encourages immediate walk-up copying in an environment where no key operator is present.

Thanks to its compact, eco-design and attractive styling, you can even place the Océ TDS100 right next to users' desks. Its extremely low noise, heat and odor emissions contribute to a pleasant working environment. Energy consumption is low, so you can leave it on standby for instant use when needed. Océ's patented radiant fusing technology means no warm up. The closed toner system can easily be refilled without spilling, and even the toner bottle is recyclable.

Easy copying, quality results

1 2

3 4

- 1 Sheet feed tabletop system
- 2 Sheet feed stand with shelves
- 3 Automatic 1 roll feed
- 4 Automatic 2 roll feed

Easy high-quality results

The Océ TDS100 lets you make clear, long-lasting copies with maximum information content from every original, which helps to avoid costly mistakes. Originals of all kinds are handled with maximum care, so there's no risk of damage to your valuable drawings. Based on the proven Océ technology, the Océ TDS100 ensures consistently high quality and reliability, even after long periods of operation.

Easy on your budget

Modular design means you can choose the configuration that perfectly matches your needs: sheet feed single- or multi-copy, either tabletop or floor-standing, and automatic feed with one or two rolls. The Océ TDS100 is supported by professional services and quality supplies, so performance is guaranteed. That makes it an excellent value and a secure investment.

You will save both time and money when you make your own large format copies in-house. These can be significant benefits, especially when you have a regular demand for copies. With no warm-up time, your copies are always available immediately. This is particularly important when you have tight deadlines to meet.

Océ is a leading supplier of digital document management and delivery technology. The company's solutions are based on Océ's advanced software applications that deliver documents and data over internal networks and the Internet to printing devices and archives—locally and around the world. Supporting the workflow solutions are Océ digital printers and scanners, considered the most reliable and productive in the world. Océ also offers a wide range of consulting and outsourcing solutions.
